

# EMPLOYEE DEVICES AND THE HYBRID WORKFORCE

A Survey of IT Device Managers

October 2021

Sponsored by:

# INTRODUCTION

When employees were sent home en masse at the beginning of the Covid pandemic, IT teams were forced to quickly adapt to a dramatic increase in remote work. With many employees advocating to stay remote – or to move to a hybrid model when they are in the office part-time - IT teams must chart a path for managing the devices both in the office and remotely.

This survey examines trends and endeavors to answer important questions including:

- **Is hybrid work a temporary blip or the model for the future?**
- **How does the hybrid workplace influence the employee device landscape?**
- **Do Apple devices have any advantages in a hybrid world?**
- **Is IT confident in remote and hybrid device management?**

# KEY FINDINGS

## **The hybrid workforce is expanding dramatically**

- 94% have hybrid workers
- 70% more than doubled the number of remote or hybrid workers in past two years
- 87% say that the good of hybrid work outweighs the bad

# METHODOLOGY AND PARTICIPANT DEMOGRAPHICS

# GOALS AND METHODOLOGY

## Research Goal

The primary research goal was to capture hard data on trends and experiences with hybrid work and employee devices.

---

## Methodology

IT stakeholders with responsibility for employee devices were invited to participate in an online survey. A variety of questions were asked on topics related to hybrid work, employee devices, and device management. Responses were captured between August 27 and September 8, 2021.

---

## Participants

A total of **324 qualified individuals** participated in the survey. All had professional responsibility for selection, implementation, or ongoing management of employee devices including computers, laptops, tablets, and smartphones.

*Certain questions may not add up to exactly 100% because of rounding.*
